## We Care About Your Privacy

We and our 909 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

unique, useful way to measure research productivity, that is related to traditional publication count approaches for both individuals and departments.

## Notes

1. A total of 11 faculty responded to email requests for vitas with information that either they did not wish to share their vita or they did not maintain information about the number and dollar values of grants they had received. These individuals are not included in the analysis.
2. This top 10 list has only seven members because following these seven individuals were seven scholars who had received funding from six state agencies. Cutting the list at seven instead of 14 is more meaningful.
3. Here again, the list has only nine members because the next grouping was eight individuals having attained research funds from three different foundations.
