Abstract

The Chinese banking sector has undergone noteworthy financial reforms, which significantly metamorphosed the banking system. This article seeks to examine the determinants of the profitability of the Chinese banking sector. The empirical analysis is confined to the four State Owned Commercial Banks (SOCBs) and the 12 Joint Stock

Notes

- 1. As part of China's World Trade Organisation (WTO) commitment to further liberalized the banking sector and to give the foreign banks completely open access to the China financial markets by year-end 2006.
- 2. Bank of Communications was made a State Owned Commercial Bank (SOCB) from Joint Stock Commercial Bank by CBRC in 2007.
- 3. In 2004, the CBRC announced that CCBs are allowed to expand to other cities if their financial performance ratios such as NPLs and Capital Adequacy Radio (CAR) exceed the average performance of the JSCBs. The move is applauded as this will enable the CCBs to expand their operations and develop economies of scale. Since then, there have been eight CCBs granted approval from CBRC for cross city/provincial operations.

central bank, the People's Bank of China (PBOC). The PBC transferred the funds from its

international reserves to a newly created entity, the Central Huijin Investment Company (Central Huijin), which acts as the holding company for the government's shares in BOC and CCB. A similar exercise was conducted in April 2005 with Industrial and Commercial Bank of China (ICBC) for a sum of US\$15bn. As in the previous cases, Central Huijin is the shareholder of government's shares in the ICBC.
