Investigating Factorial Invariance of Latent Variables Across Populations When Manifest Variables Are Missing Completely

Keith F. Widaman, Kevin J. Grimm, Dawnté R. Early, Richard W. Robins & Rand D. Conger Pages 384-408 | Published online: 22 Jul 2013

L Cite this article Attps://doi.org/10.1080/10705511.2013.797819

variable level between groups using programs that require the same number of manifest variables in each group.

Notes

¹EQS (<u>Bentler, 2006</u>) scripts and output files for all models presented in this article are available on request from the first author.

²Mplus (<u>Muthén & Muthén, 2007</u>) scripts and output files for all pattern mixture models presented in this article are available on request from the first author.

³Analysis scripts and output files for all models presented in this article using the random data approach are available on request from the first author.
