## We Care About Your Privacy

We and our 899 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

# Notes

<sup>1</sup>In this article, we follow the tradition that cells are labeled by row number-column number (in this order).

<sup>2</sup>Note that the same conceptual framework as counterfactual causality is used in Rubin's ([1977](#)) approach to statistically investigating causal hypotheses. This approach is considered among the most influential existing statistical approaches to causality testing.
