We Care About Your Privacy

We and our 878 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting I Accept enables tracking technologies to support the purposes shown under we and our partners process data to provide. Selecting Reject All or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the Show Purposes link on the bottom of the webpage. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

Notes

¹In this article, we follow the tradition that cells are labeled by row number-column number (in this order).

²Note that the same conceptual framework as counterfactual causality is used in Rubin's ([1977](#)) approach to statistically investigating causal hypotheses. This approach is considered among the most influential existing statistical approaches to causality testing.
