Sažetak

Rad empirijski istražuje dugoročnu vezu između kratkoročnih ključnih kamatnih stopa i kamatnih stopa na depozite i kredite u Jordanu. Tehnički, ispituje brzinu prilagodbe i pass-through od ključne stope do kamatnih stopa na depozite i kredite. Empirijski dokazi jordanske ekonomije pokazuju da se kamatne stope na depozite i kredite prvenstveno usklađuju u odnosu na odmak od dugoročne stabilnosti u prethodnom periodu. Nadalje, kamatne stope na kredite i depozite slijede simetrična kretanja u svojim devijacijama od dugoročne stabilnosti. Shodno tome, Jordanska Centralna Banka ima moć kontrole razlike između kamatnih stopa na depozite i onih na kredite. Osim toga, kamatne stope na depozite se usklađuju šire i brže od kamatnih stopa na kredite radi devijacije od dugoročne stabilnosti. Zbog toga jordanska monetarna politika treba oko 11 kvartala da bi bila efikasna.

🔍 Key words: [Monetary policy](#) [Central bank](#) [Symmetric adjustment](#) [Interest rate pass-through](#)
[Error correction model](#)

🔍 Ključne riječi:: [Monetarna politika](#) [Centralna banka](#) [Simetrično usklađivanje](#)
[Prijenos \(passthrough\) kamatnih stopa](#) [Model korekcije greške](#)
