## Abstract

This paper endeavors to compare the profitability of Moving Average Envelopes and Bollinger Bands. Despite the fact that Bollinger Bands can capture sudden price fluctuations, Moving Average Envelopes are more effective in capturing Bollinger Bands during periods of high volatility.

### We Care About Your Privacy

We and our 843 partners store and/or access information on a device, such as unique IDs in cookies to process personal data. You may accept or manage your choices by clicking below, including your right to object where legitimate interest is used, or at any time in the privacy policy page. These choices will be signaled to our partners and will not affect browsing data. [Privacy Policy](#)

We and our partners process data to provide:

Use precise geolocation data. Actively scan device characteristics for identification. Store and/or access information on a device. Personalised advertising and content, advertising and content measurement, audience research and services development.
