### We Care About Your Privacy

We and our 909 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting I Accept enables tracking technologies to support the purposes shown under we and our partners process data to provide. Selecting Reject All or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the Show Purposes link on the bottom of the webpage. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

## Acknowledgements

The author is grateful to Harry J. Paarsch and Charles H. Whiteman for helpful comments and useful suggestions. The data set used for this analysis is maintained by the Illinois Farm Business Farm Management Association (IFBFMA). The same raw data set was used by Lence and Hart ([1997](#)), and it was from them, with permission of Dale Lattz of the IFBFMA, that the raw data were obtained; their helpfulness is gratefully acknowledged.

## Notes

<sup>1</sup>See Stutzer ([2000](#)) and Haley and Whiteman ([2008](#)) for a thorough presentation of the PPI and GSF. Haley ([2005](#)) contains a broader discussion of the land allocation problem.
