We Care About Your Privacy

We and our 857 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

Acknowledgements

The authors thank Anna Dreber Almenberg, Marieke Bos and Magnus Johannesson for helpful comments and Finansinspektionen for providing the data. Johan Almenberg thanks Sveriges Riksbank for financial support.

Notes

Note: The views expressed here are the views of the authors in their capacity as researchers and do not represent the views of the Swedish Ministry of Finance.

¹ ‘Suppose you invest 100 SEK and the interest rate is 7% per year. If you don't withdraw any money, how much money do you have in this account after 30 years?’

² We elicit exponential growth bias in a slightly different way from Stango and Zinman (2009). They construct their measure indirectly based on two questions, while we use the result of one question that directly measures the bias. This may explain why such a high fraction of their sample, 98%, is in this range.
