

On Tuesday 1 July 2025, 04:00-21:00 GMT, we'll be making some site updates on Taylor & Francis Online. You'll still be able to search, browse and read our articles, where access rights already apply. Registration, purchasing, activation of tokens, eprints and other features of Your Account will be unavailable during this scheduled work.

We Care About Your Privacy

We and our 909 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

² Another online ranking source can be found at <http://www.eigenfactor.org/>

³ Similarly, the relative merits of the Institute for Scientific Information (ISI) Journal Impact Factor (JIF) versus the Google Scholar-based approaches are left to prior research; see, for example, Harzing and van der Wal (2009). Additionally, it is worth noting that there is often a very high correlation between stated and revealed preference orderings (Mingers and Harzing, 2007; Bontis and Serenko, 2009), suggesting that the rankings from either method may agree.

⁴ Details about these metrics can be found at <http://www.harzing.com/en.htm>

⁵ Unsurprisingly, the results from the two methods are very similar
