Notes

¹ <http://www.aacsb.edu/publications/researchreports/currentreports/impact-of-research.pdf>

² Another online ranking source can be found at <http://www.eigenfactor.org/>

³ Similarly, the relative merits of the Institute for Scientific Information (ISI) Journal Impact Factor (JIF) versus the Google Scholar-based approaches are left to prior research; see, for example, Harzing and van der Wal (2009). Additionally, it is worth noting that there is often a very high correlation between stated and revealed preference orderings (Mingers and Harzing, 2007; Bontis and Serenko, 2009), suggesting that the rankings from either method may agree.

⁴ Details about these metrics can be found at <http://www.harzing.com/pop.htm>

⁵ Unsurprisingly, using the range of ranks as the dependent variable gives very similar regression results.

⁶ Some stated journal ranking results can be found at http://www.harzing.com/download/jql_journal.pdf
