Abstract

This article examines the relationship between oil production and economic growth based on time-series data of Saudi Arabia from 1971 to 2010, and the Autoregressive Distributed Lag (ARDL) model approach for cointegration has been used. The innovative contribution of this study is to determine long-run relationship between oil production and economic growth by disaggregating oil production into domestic consumption of oil in industrial sector and revenues earned from export of oil. Results show that oil
