## We Care About Your Privacy

We and our 855 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

Notes

<sup>1</sup> Pierdzioch et al. ([2011](#)) analyse whether it is indeed the case that professional forecasters believe in this relationship. They use survey data for the G7 countries and report that professional economists' forecasts of changes in the unemployment rate and the growth rate of real output are consistent with Okun's law. See also Mitchell and Pearce ([2010](#)) in this context.

<sup>2</sup> The data set for Austria is shorter, starting in 1994 as the unemployment rates for different age groups are not available at an earlier date. Countries that joined the EMU at a later date, i.e. mainly countries from eastern and south-eastern Europe, are excluded because of a lack of consistent data. Furthermore, Luxembourg is excluded as well because of its rather small economic weight.
