Abstract

Gold's role as a safe haven asset has been intensively studied in recent years. This article extends the previous literature and examines the safe haven properties of four precious metals (gold, silver, platinum and palladium) in a time-varying manner. Results from the palladium strength haven.

We Care About Your Privacy

We and our 843 partners store and/or access information on a device, such as unique IDs in cookies to process personal data. You may accept or manage your choices by clicking below, including your right to object where legitimate interest is used, or at any time in the privacy policy page. These choices will be signaled to our partners and will not affect browsing data. [Privacy Policy](#)

We and our partners process data to provide:

Use precise geolocation data. Actively scan device characteristics for identification. Store and/or access information on a device. Personalised advertising and content, advertising and content measurement, audience research and services development.
