## Abstract

From first principles, using general no-arbitrage arguments across international markets, differential swaps and a variety of quanto options and futures are evaluated and replicated in closed form by explicit construction of their hedge portfolios, under the assumption of a complete market.

### We Care About Your Privacy

We and our 845 partners store and/or access information on a device, such as unique IDs in cookies to process personal data. You may accept or manage your choices by clicking below, including your right to object where legitimate interest is used, or at any time in the privacy policy page. These choices will be signaled to our partners and will not affect browsing data. [Privacy Policy](#)

We and our partners process data to provide:

Use precise geolocation data. Actively scan device characteristics for identification. Store and/or access information on a device. Personalised advertising and content, advertising and content measurement, audience research and services development.
