We Care About Your Privacy

We and our 899 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

countries benefit from international collaboration, but they must not move too far away

from any distinctive scientific competences they have already developed. We also provide detailed mapping of the countries with whom the universities collaborated.

bibliometrics

Notes

1 The global (world average) increase was 35% for these periods, so each university grew much faster.

2 One limitation of these indicators is they are developed using all papers, not just internationally co-authored. Future research could develop separate indicators for domestic versus international papers.
