or fails to honour the agreement to repurchase the underlying assets.

4 We acknowledge that the ideal control group for our difference-in-differences analysis would be composed of banks to which all regulations except for the BAPCPA regulations relating to repo transactions apply. This control group does not exist since all US banks fall within the scope of the BAPCPA.

5 Sometimes provisions are inserted in the repurchase agreement which prohibits the sale and/or rehypothecation of the collateral to third parties.

6 SFAS 140, 'Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities' was issued in September 2000. It was amended by SFAS 166 (FASB [2009](#)) 'Accounting for Transfers of Financial Assets an amendment of FASB Statement No. 140' and more recently FASB issued Accounting Standard Updated (ASU) 2014-2011 Transfers and Servicing (Topic 860) (FASB [2014](#)) 'Repurchase-to Maturity Transactions, Repurchase Financings, and Disclosures' which expand disclosures on repurchase agreements.

7 Bankruptcy Abuse Prevention and Consumer Protection Act of 2005, Pub. L. No. 109-8, §907, 119 Stat. 23, 171-172

8 Vide Table 1 for the major Congressional events in 2005 that led to the passage of the Bankruptcy Abuse and Consumer Protection Act (BAPCPA) of 2005.

9 The use of three-day event windows is well established in the literature. For example, Bushee and Goodman ([2007](#)); Krishnamurthy, Zhou, and Zhou ([2006](#)); Pinnuck ([2005](#)) and Ali et al. ([2004](#)) all use three-day time windows in their research design.

14 In untabulated results we obtain the same inferences when we run the analyses without winsorizing the data.

15 Further detail on this approach is provided in Sefcik and Thompson ([1986](#)).

16 Prior to data refinement that is based on the Sefcik and Thompson ([1986](#)) adjustment we have 459 unique bank holding companies. Thus, the use of the Sefcik and Thompson ([1986](#)) adjustment leads to the loss of 10 banks.

17 We recognize that due to limited data availability we are unable to control for the type of repo agreements the company engages into. As previously discussed it is only after ASU 2014-2011 became effective in 2015, that companies were required to disclose detailed information about the type of repo agreements they engage in.

18 Given that the choice of the beginning and end of sample period is 'ad-hoc' in robustness tests we test for the sensitivity of our results to this research design choice.

19 The economic significance is calculated as the coefficient on the interaction term (0.0019) divided by the mean SPR for the sample (0.00248).

20 This is a rough proxy of total holdings of mortgaged backed securities since this variable is only based on recognised mortgage backed securities. Banks might have other such securities held as collateral on repo and similar arrangements with counterparties and which are not recognised in the financial statements. Unless otherwise specified, these might be rehypothecated in other repo agreements. Information about such collateral is not publicly available.
