Abstract

This article explores the phenomenon of parasocial mourning on Facebook RIP pages. The article discusses how these pages function as a form of mediated mourning, where users express their grief and share memories of the deceased. The article also examines the role of these pages in the context of digital media ecology and the impact of mediated deaths on the RIP pages. The article concludes by discussing the implications of these pages for the study of digital media ecology and the impact of mediated deaths on the RIP pages.

We Care About Your Privacy

We and our 842 partners store and/or access information on a device, such as unique IDs in cookies to process personal data. You may accept or manage your choices by clicking below, including your right to object where legitimate interest is used, or at any time in the privacy policy page. These choices will be signaled to our partners and will not affect browsing data. [Privacy Policy](#)

We and our partners process data to provide:

Use precise geolocation data. Actively scan device characteristics for identification. Store and/or access information on a device. Personalised advertising and content, advertising and content measurement, audience research and services development.

Notes

[1] This quote and all other quotes in the article have, unless explicitly stated, been translated by the author from Danish to English. Since this study focuses on vernacular communicative practices, and in order to preserve the original feel of the sentence, in translation it has been a priority to keep a wording as close to the original as possible even if it may result in a somewhat clumsy English phrasing.
