Abstract

This study explores the implementation of the kanban system, which is a Lean technique that provides insights into the supply chain. It also provides a field-based, activity-based, and data-driven case study within the pharmaceutical supply chain. It also provides a field-based, activity-based, and data-driven case study within the pharmaceutical supply chain. It also provides a field-based, activity-based, and data-driven case study within the pharmaceutical supply chain.
