Abstract

This paper offers an overview of the existing literature concerning problem gambling and families and identifies gaps in current research knowledge on this topic. Relevant theoretical and empirical research is reviewed, and the implications for the development of problem gambling interventions are discussed. The paper concludes that the development of effective interventions for problem gambling requires a focus on the effects of problem gambling on families and the role of parents. The paper concludes that the development of effective interventions for problem gambling requires a focus on the effects of problem gambling on families and the role of parents. The paper concludes that the development of effective interventions for problem gambling requires a focus on the effects of problem gambling on families and the role of parents.
