DISCIOSURE STATEMENT

No potential conflict of interest was reported by the authors.

Notes

1 This selection of publications was determined by time constraints and what was available on Factiva as far back as 1988. While we note the narrowness of this sample as a limitation, it allowed like to be compared with like as far as possible.

- 4 The articles were analysed to identify the most salient topic or topics, as they sometimes overlapped in the same article. The main ways in which the topics were discussed, the narratives used, and the language used to describe events were identified and then coded using NVivo.
- 5 The GFC presented a more complex form of an asset bubble when compared to the Dot Com boom or the 1990 recession. As such, it was anticipated to be less likely that journalists would be able to pick up early warning signs for the public.
- 6 After an initial pilot study 17 categories of sources were identified. The following is a list of all of the directly quoted sources: business source; analyst; individual investor/trader; institutional investor/trader; business economist; public relations; business research; politician; banker; central bank; government-funded body; business lobby group; academic economist; academic; non-government organisation; member of the public; editor/journalist. A full tabulation of the coded sources for each article is available upon request.

7 Some of the articles appeared in more than one category and additional topics were identifie X blication 8 The da shows th ent is on: New York expresse or the Dot Times (6 Com boo rning the Sydney Herald (Morn 9 In bot percentage a from all of the to publicati 10 More
