We Care About Your Privacy

We and our 855 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

Acknowledgements

This work was supported by the Austrian Science Foundation project FWF P17621-G05. We thank J D Farmer for valuable comments to improve the paper and Haijun Zhou for making his dissimilarity index algorithm available. S T would like to thank the SFI and, in particular, J D Farmer for their great hospitality in the summer of 2003.
