## Notes

Concerning population shares, no official statistical numbers are provided for Germany. All public, private nonprofit and private for-profit hospitals might or might not be part of a hospital system. Moreover, hospitals of all ownership types might have teaching status. Roundabout one-third of hospitals have teaching status. As larger hospitals are more likely to have teaching status, the higher proportion of hospitals with teaching status in our sample is in line with hospital size.

The only exception is organizational performance with .69 which we judged as acceptable as well.
