ABSTRACT

With goals to improve the 'collective' value proposition of member networks through collaborative efforts. A network of food systems administrators and public health officials are working with multiple subnetworks to...

We Care About Your Privacy

We and our 843 partners store and/or access information on a device, such as unique IDs in cookies to process personal data. You may accept or manage your choices by clicking below, including your right to object where legitimate interest is used, or at any time in the privacy policy page. These choices will be signaled to our partners and will not affect browsing data. [Privacy Policy](#)

We and our partners process data to provide:

Use precise geolocation data. Actively scan device characteristics for identification. Store and/or access information on a device. Personalised advertising and content, advertising and content measurement, audience research and services development.

Acknowledgements

We wish to thank Bud Meyers for his support of this project, and to the leadership of the Farm to Plate Network for their willingness to participate in this research project.

Disclosure statement

No potential conflict of interest was reported by the authors.

Notes

1. The Farm to Plate website may be found at: <http://www.vtfarmtoplate.com/>
 2. For this analysis, we used the network analytic software program *ORA (Carley [2001–11](#)), which is designed a package for general network analysis, allowing for a wide array of analyses on network data from any field of study. Along with its capacity for all standard network analytic techniques, *ORA contains specialized tools for dynamic network analysis and geographically linked network analysis. See the *ORA Publications list (CASOS [2015](#)) for an extensive list of publications documenting the use of *ORA.
