## We Care About Your Privacy

We and our 855 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

## Acknowledgements

We wish to thank Bud Meyers for his support of this project, and to the leadership of the Farm to Plate Network for their willingness to participate in this research project.

## Disclosure statement

No potential conflict of interest was reported by the authors.

## Notes

1. The Farm to Plate website may be found at: <http://www.vtfarmtoplate.com/>
2. For this analysis, we used the network analytic software program \*ORA (Carley [2001-11](#)), which is designed a package for general network analysis, allowing for a wide array of analyses on network data from any field of study. Along with its capacity for all standard network analytic techniques, \*ORA contains specialized tools for dynamic network analysis and generating the linked network analysis. See the \*ORA Publications list (CAS) of \*ORA.
