the crisis of legitimacy of representative democracy; targeted primarily national political and economic oligarchies; and mobilized newcomers through an inclusive collective identity constructed around the 'ordinary citizen' as political subject. Democratic regeneration emerges as a significant demand, but is uneven in its resonance. It finds its clearest and most emblematic expression in the 'movements of the squares'. To the extent that the 'twin' crises (financial/democratic) are framed synergistically, they can be seen as counter-hegemonic, as they seek to rupture the consensus of the 'post-political'. The presence or absence of a strong pro-democracy narrative that connects actors across sectorial and organizational differences could help explain variation between cases. Transnational diffusion processes have been crucial but have not (yet) led to a transnational movement. Given the significant role of the Troika in the bail-outs, debt renegotiations and austerity policies of those countries hardest hit, the low visibility of 'Europe' in the mobilizations is surprising.

8. I realize that what movements are called are often contested, the result of early media labels, etc. I nevertheless usually opt for the label I think most people will understand.
9. I was astonished to discover, during a research event I co-coordinated at Harvard's Berkman Center for Internet and Society in 2012, that some local activists had never heard of the European protests, and thought that the Occupy style movements such as OWS and Occupy Boston were unique to the US.
10. Despite the Pirate Party polling at 22%, above the Independence Party, the latter was the most voted party in the 2016 general elections, with 21 MPs. The Pirate Party nevertheless jumped from 2 to 10 MPs.
