Abstract

Anchoring is a term used in psychology to describe the common human tendency to

rely too much on the first piece of information received when making decisions. Here a

trading algorithm is used to test the anchoring bias. The algorithm is based on a

suggestive price level. The algorithm is based on a solution of the anchoring bias. The

the algorithm is based on a solution of the anchoring bias. The algorithm is based on a

extended evidence of the anchoring bias. The algorithm is based on a solution of the

that anchors the price. The algorithm is based on a solution of the anchoring bias. The

of arbitrage. The algorithm is based on a solution of the anchoring bias. The algorithm

difficult to price. The algorithm is based on a solution of the anchoring bias. The

We Care About Your Privacy

We and our 880 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting I Accept enables tracking technologies to support the purposes shown under we and our partners process data to provide. Selecting Reject All or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the Show Purposes link on the bottom of the webpage. Your choices will have effect within our Website.
