We Care About Your Privacy

We and our 870 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

Identify opportunities for the use of intelligent transportation systems in last mile distribution.

Keywords: Last Mile Distribution Humanitarian Relief Chains Integrated Routing and Resource Allocation

The authors would like to thank World Vision International, especially Randy Strash and George Fenton, for providing us with an understanding of the last mile distribution process. This work was partly supported by NSF grants CMMI-0624219 and DMI 0348622.
