ABSTRACT

Kingdom of Saudi Arabia (KSA) has the fourth largest natural gas (NG) reserves in the world. One third of these reserves are located in the Ghawar region of Eastern Province. NG production is controlled tightly due to close conjunction with oil production until recently. KSA's NG production of 85 billion cubic meters in 2015 from 70 billion cubic meters in 2008 sets an average annual increase of 2.7%. More than half of the annual KSA's NG production has been accompanied by gas. The Saudi Gas Initiative (SGI) aims to increase foreign investment in the NG development sector through petrochemicals,
