Abstract

Drawing upon original research examining urban agriculture projects in Denver, Colorado, this article explores the "growing" metaphor used in community development circles, especially those involving food-growing schemes. The authors propose the following analytic distinction: above ground/below ground. The former

Acknowledgments

The authors want to thank Dr. John Green and the anonymous referees for their helpful comments and suggestions. Thanks also to all those who participated in this research. Finally, the authors are deeply grateful to Dr. Cornelia Flora and Dr. Jan Flora for their support and collegiality (which was on full display on May 21, 2015, when they led an all-day Community Capitals workshop on the campus of Colorado State University at the request of Michael). The arguments herein contained, however, are the authors' own.
