## We Care About Your Privacy

We and our 907 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

Show Purpose

Modifications were found, aimed at negating the clients’ responsibility for risk. The originality of this research lies in its methodological approach and its focus on how risks are allocated. Findings can help practitioners to better allocate risk and promote the achievement of desired project outcomes through careful selection and utilization of mechanisms, allocation of risk and use of contract clauses.

Keywords:

- Building projects
- pareto analysis
- zambia
- pertinent risks

## Acknowledgements

Gratitude and sincere thanks to the Copperbelt University for providing funding for this research.

## Disclosure statement

No potential conflict of interest was reported by the authors
