Show Purpose

simple questions to be addressed solely by service providers, customers, or government regulators. This paper will present the concept of an infrastructure commons and recommend some initial actions that the federal government could take to ensure that the national ‘public good’ aspect of civil is preserved and enhanced. These actions include the beginning of an informed and serious dialogue between the public and private sectors, building coalitions for action among stakeholders in the governance process, and exploring alternative mechanisms for ensuring dependable and sustainable resource streams.

Keywords: Sustainable infrastructure Supply chains Infrastructure commons
