- 1. The launch of the Cambridge Impact Framework (on 31 January 2019) is an important step forward towards this for ESG analysis, but is focused primarily on impacts (CISL 2019).
- 2. For example, with the proposed sustainable benchmarks regulation on 25 February 2019.
- 3. Other forms of capital include: financial, manufactured, intellectual, human and social and relationship.

- 8. Note, the previous iteration of the case study accounted for the loss from wider benefits, however, insufficient information was publicly reported to include this in this article. However, this omission has limited impact on the net contribution.
- 9. Although growth is likely to slow as the stock matures, given the overall increase in the stock, it is assumed that the age of the stock remains approximately constant for ease of computation.
- 10. For example, given that all five conservation sites were inaugurated since 2013 (SCA 2013) more sites are likely to be added over the remaining 100-year period.
