## Abstract

The disposition effect refers to the tendency to hold losing investments and sell profitable ones. We examine day trader transactions for evidence of a disposition effect. We find that approximately 65% of sample traders hold losing trades longer than profitable ones, providing evidence that sample day traders display the disposition effect.

### We Care About Your Privacy

We and our 842 partners store and/or access information on a device, such as unique IDs in cookies to process personal data. You may accept or manage your choices by clicking below, including your right to object where legitimate interest is used, or at any time in the privacy policy page. These choices will be signaled to our partners and will not affect browsing data. [Privacy Policy](#)

We and our partners process data to provide:

Use precise geolocation data. Actively scan device characteristics for identification. Store and/or access information on a device. Personalised advertising and content, advertising and content measurement, audience research and services development.
