Abstract

The purpose of the study is to assess the awareness and attitudes of student teachers in Turkey. The relationship between the student teachers' attitudes and their gender, academic achievement, family income, and environmental awareness was evaluated. The study was carried out in a secondary school in Istanbul. The sample consisted of 830 subjects. The results of the study showed that the awareness of student teachers towards environmental issues was low. The study also found that the attitudes of student teachers towards environmental issues were positive. The study concluded that the awareness of student teachers towards environmental issues should be improved. The study also suggested that the attitudes of student teachers towards environmental issues should be improved. The study also suggested that the awareness of student teachers towards environmental issues should be improved.
