competencies in history taking (2.67 vs. 2.51;  $p = 0.00$ ), examination (2.72 vs. 2.59;  $p = 0.01$ ) and resuscitation (2.27 vs. 1.96;  $p = 0.00$ ). The majority (65%) felt adequately supervised.

Conclusions: Our survey has demonstrated that FDs find working nights a valuable experience, providing important training opportunities, which are additional to those encountered during daytime working.

Declaration of interest: All authors have completed the Unified Competing Interest form at [www.icmje.org/coi\\_disclosure.pdf](http://www.icmje.org/coi_disclosure.pdf) (available on request from the corresponding author) and declare: no support from any organisation for the submitted work; no financial relationships with any organisations that might have an interest in the submitted work in the previous three years; no other relationships or activities that could appear to have influenced the submitted work. No funding has been received for this work from any source.

Ethical approval: We did not seek ethical approval for this study because participants could not be identified from the material presented and no plausible harm was anticipated to participating individuals that would arise from the study. This data was analysed from our anonymised quality management database.
